WHAT IS CLAIMED IS:

- 1. A light fixture comprising:
- a candle base;
- at least one candle assembly adapted to carry a light bulb having an attachment base; and
- a translucent candle cover formed by an elongated sleeve mounted on each said candle assembly, said sleeve having a length defined between a top portion and a bottom portion, said length having sufficient dimension to extend said top portion of said sleeve above said attachment base of said light bulb.
- 2. The light fixture as recited in claim 1, wherein said length is dimensioned to extend said top portion of said sleeve between approximately 1/8 inch to 1/4 inch above said attachment base of said light bulb.
- 3. The light fixture as recited in claim 2, wherein said length is dimensioned to extend said top portion of said sleeve approximately 1/4 inch above said attachment base of said light bulb.
- 4. The light fixture as recited in claim 1, wherein said sleeve is formed from transparent glass.
- 5. The light fixture as recited in claim 4, wherein an interior surface of said longitudinal bore is coated with fired paint.
- 6. The light fixture as recited in claim 5, wherein an exterior surface of said sleeve has

surface ornamentation formed to simulate candle wax dripping.

- 7. A light fixture candle assembly comprising: a stand having a light bulb socket adapted to receive a light bulb with an attachment base;
- a translucent candle cover formed by an elongated sleeve having a length defined between a top portion and a bottom portion, said sleeve having a longitudinal bore therethrough which is dimensioned to receive said stand; and

wherein said length has sufficient dimension to extend said top portion of said sleeve above said attachment base of said light bulb attached to said socket.

- 8. The light fixture candle assembly as recited in claim 7, wherein said sleeve defines a shoulder extending radially inward in said top portion of said sleeve to define a top hole, said top hole having a smaller dimension than said longitudinal bore.
- 9. The light fixture candle assembly as recited in claim 8, wherein said top hole is dimensioned to receive a portion of said light bulb.
- 10. The light fixture candle assembly as recited in claim 7, wherein said length is dimensioned to extend said top portion of said sleeve between approximately 1/8 inch to 1/4 inch above said attachment base of said light bulb.
- 11. The light fixture candle assembly as recited in claim 7, wherein said length of said

sleeve is dimensioned to extend said top portion of said sleeve approximately 1/4 inch above said attachment base of said light bulb.

- 12. The light fixture candle assembly as recited in claim 7, wherein said sleeve is formed from glass.
- 13. The light fixture candle assembly as recited in claim 12, wherein an interior surface of said longitudinal bore is coated with a colored material to provide a translucent layer.
- 14. The light fixture candle assembly as recited in claim 13, wherein said translucent layer is formed by paint which has been fired.
- 15. The light fixture candle assembly as recited in claim 7, wherein said sleeve has an exterior surface with surface ornamentation.
- 16. The light fixture candle assembly as recited in claim 15, wherein said surface ornamentation is formed to simulate candle wax dripping.
- 17. A candle cover for a light fixture candle assembly, said candle cover comprising:

an elongated sleeve formed of transparent glass; said sleeve having a length defined between a top portion and a bottom portion, said sleeve having a longitudinal bore extending from said bottom portion to said top portion, said sleeve having a shoulder extending radially inward in said top portion to define a top hole; and

an interior surface of said sleeve being coated with a colored material.

- 18. The candle cover as recited in claim 17, wherein an interior surface of said longitudinal bore is coated with fired paint.
- 19. The candle cover as recited in claim 17, wherein an exterior surface of said sleeve has surface ornamentation formed to simulate candle wax dripping.
